CONTENTS OF VOLUME 124

NUMBER 1, 5 SEPTEMBER 1978

BARRANTES, F. J., Agonist-mediated Changes of the Acetylcholine Receptor in its Membrane Environment 1

FRASER, N. and ZIFF, E., RNA Structures Near Poly(A) of Adenovirus-2 Late Messenger RNAs 27

DIJKSTRA, B. W., DRENTH, J., KALK, K. H. and VANDERMAELEN, P. J., Three-dimensional Structure and Disulfide Bond Connections in Bovine Pancreatic Phospholipase A_2 53

NAKANISHI, M. and TSUBOI, M., Two Channels of Hydrogen Exchange in a Double-helical Nucleic Acid 61

LESCURE, B., CHESTIER, A. and YANIV, M., Transcription of Polyoma Virus DNA *in Vitro*. II. Transcription of Superhelical and Linear Polyoma DNA by RNA Polymerase II 73

LESCURE, B., DAUGUET, C. and YANIV, M., Transcription of Polyoma Virus DNA *in Vitro*. III. Localization of Calf Thymus RNA Polymerase II Binding Sites 87

SCHNEIDER, D., ZULAUF, M., SCHÄFER, R. and FRANKLIN, R. M., Structure and Synthesis of a Lipid-containing Bacteriophage. XXVI. Neutron Small Angle Scattering on Bacteriophage PM2 97

SOWADSKI, J., CORNICK, G. and KRETSINGER, R. H., Terbium Replacement of Calcium in Parvalbumin 123

NUCCI, R., RAIA, C. A., VACCARO, C., SEPE, S., SCARANO, E. and ROSSI, M., Freezing of dCMP Aminohydrolase in the Activated Conformation by Glutaraldehyde 133

POLLOCK, T. J., TESSMAN, I. and TESSMAN, E. S., Radiological Mapping of Functional Transcription Units of Bacteriophages ϕX174 and S13. The Function of Proximal and Distal Promoters 147

WYMAN, J., GILL, S. J., GAUD, H. T., COLOSIMO, A., GIARDINA, B., KUIPER, H. A. and BRUNORI, M., Thermodynamics of Ligand Binding and Allosteric Transition in Hemoglobins. Reaction of Hb Trout IV with CO . . 161

KANEHISA, M. I. and TSONG, T. Y., Mechanisms of the Multiphasic Kinetics in the Folding and Unfolding of Globular Proteins 177

Salstrom, J. S. and Szybalski, W., Coliphage λnutL$^-$: A Unique Class of Mutants Defective in the Site of Gene *N* Product Utilization for Anti-termination of Leftward Transcription 195

Case, S. T. and Daneholt, B., The Size of the Transcription Unit in Balbiani Ring 2 of *Chironomus tentans* as Derived from Analysis of the Primary Transcript and 75 S RNA 223

Brayer, G. D., Delbaere, L. T. J. and James, M. N. G., Molecular Structure of Crystalline *Streptomyces griseus* Protease A at 2·8 Å Resolution. I. Crystallization, Data Collection and Structural Analysis 243

Brayer, G. D., Delbaere, L. T. J. and James, M. N. G., Molecular Structure of Crystalline *Streptomyces griseus* Protease A at 2·8 Å Resolution. II. Molecular Conformation, Comparison with α-Chymotrypsin and Active-site Geometry 261

Letters to the Editor

Liddel, J. M., Shaw, W. V. and Swan, I. D. A., Preliminary Crystallographic Data for a Chloramphenicol Acetyltransferase from *Escherichia coli* 285

Schiffer, M., Westholm, F. A., Panagiotopoulos, N. and Solomon, A., Crystallographic Data on a Complete κ-Type Human Bence–Jones Protein 287

Zeiri, L. and Reisler, E., Uncoupling of the Catalytic Activity and the Polymerization of Beef Liver Glutamate Dehydrogenase 291

McLachlan, A. D., Coiled Coil Formation and Sequence Regularities in the Helical Regions of α-Keratin 297

Number 2, 15 September 1978

Shulman, R. G., Eisenberger, P., Teo, B. K., Kincaid, B. M. and Brown, G. S., Fluorescence X-ray Absorption Studies of Rubredoxin and its Model Compounds 305

Wodak, S. J. and Janin, J., Computer Analysis of Protein–Protein Interaction 323

Müller, W., Weber, H., Meyer, F. and Weissmann, C., Site-directed Mutagenesis in DNA: Generation of Point Mutations in Cloned β Globin Complementary DNA at the Positions Corresponding to Amino Acids 121 to 123 . 343

Débarbouillé, M., Shuman, H. A., Silhavy, T. J. and Schwartz, M., Dominant Constitutive Mutations in *malT*, the Positive Regulator Gene of the Maltose Regulon in *Escherichia coli* 359

Sakakibara, Y., Discontinuous Replication of Colicin E1 Plasmid DNA in a Cell Extract Containing Thermolabile DNA Ligase 373

Lutter, L. C., Kinetic Analysis of Deoxyribonuclease I Cleavages in the Nucleosome Core: Evidence for a DNA Superhelix 391

Appendix : Use of End-labelling and DNase I Digestion to Assay for Structural Integrity of the Nucleosome Core 418

Letter to the Editor

Yoo, C. S., Wang, B-C., Sax, M. and Johnson, A. D., Preliminary Crystallographic Data for *Staphylococcus aureus* Exfoliative Toxin . 421

Number 3, 25 September 1978

Hattman, S., Keister, T. and Gottehrer, A., Sequence Specificity of DNA Methylases from *Bacillus amyloliquefaciens* and *Bacillus brevis* . . 701

Letter to the Editor

Driedonks, R. A., Krijgsman, P. C. J. and Mellema, J. E., Coat Protein Polymerization of Alfalfa Mosaic Virus Strain VRU . . . 713

Index to Volume 124

Acetylcholine receptor, agonist-mediated changes in its membrane environment, 1
Actin filaments in muscle: pattern of myosin and tropomyosin/troponin attachments, 501
—, interaction with myosin subfragment-1, and its relation to the binding of skeletal muscle C-protein to F-actin, 571
Adenovirus-2 late messenger RNA poly(A), nearby RNA structures, 27
Agonist-mediated changes of the acetylcholine receptor in its membrane environment, 1
Alfalfa mosaic virus strain VRU, coat protein polymerization, 713
Allosteric transition and ligand binding thermodynamics in hemoglobins. Reaction of Hb trout IV with CO, 161
Amphiphilic membrane glycoproteins of Semliki Forest virus are attached to the lipid bilayer by their COOH-terminals ends, 535
Antitermination of leftward transcription: coliphage $\lambda nut\mathrm{L}^-$, a unique class of mutants defective in the site of gene *N* product utilization, 195
Assembly of the Semliki Forest virus membrane glycoproteins in the membrane of the endoplasmic reticulum *in vitro*, 587
— — T4 baseplate, isolation and characterization of precursors. The complex of gene *10* and gene *11* products, 469

Bacillus amyloliquefaciens and *Bacillus brevis*, sequence specificity of DNA methylases, 701
— *brevis* and *Bacillus amyloliquefaciens*, sequence specificity of DNA methylases, 701
Bacteriophage PM2, neutron small angle scattering, 97
— T4 baseplate assembly, isolation and characterization of precursors. The complex of gene *10* and gene *11* products, 469
Bacteriophages ϕX174 and S13, radiological mapping of functional transcription units. The function of proximal and distal promoters, 147
Balbiani ring 2 of *Chironomus tentans*, size of the transcription unit as derived from analysis of the primary transcript and 75 S RNA, 223
Barrantes, F. J., Agonist-mediated changes of the acetylcholine receptor in its membrane environment, 1
Baseplate assembly, T4, isolation and characterization of precursors. The complex of gene *10* and gene *11* products, 469
Bastia, D., Determination of restriction sites and the nucleotide sequence surrounding the relaxation site of ColE1, 601
Beef liver glutamate dehydrogenase, uncoupling of the catalytic activity and the polymerization, 291
Bence-Jones protein, human, κ-type, complete, crystallographic data, 287
Berg, H. C. (see also Wennogle, L. P.), 689
Berget, P. B. & King, J., Isolation and characterization of precursors in T4 baseplate assembly. The complex of gene *10* and gene *11* products, 469
Besterman, J. M. (see also Moos, C.), 571
β globin complementary DNA, cloned, generation of point mutations at the positions corresponding to amino acids 121 to 123; site-directed mutagenesis in DNA, 343
Binding of skeletal muscle C-protein to F-actin, and its relation to the interaction of actin with myosin subfragment-1, 571
— sites of calf thymus RNA polymerase II, localization on polyoma DNA, 87
Borisy, G. G., Polarity of microtubules of the mitotic spindle, 565
Bovine pancreatic phospholipase A_2, three-dimensional structure and disulfide bond connections, 53
Branscomb, E. W. (see also Galas, D. J.), 653
Brayer, G. D., Delbaere, L. T. J. & James, M. N. G., Molecular structure of crystalline *Streptomyces griseus* protease A at 2·8 Å resolution. I. Crystallization, data collection and structural analysis, 243
—, — & —, — — — — — — — — — — —. II. Molecular conformation, comparison with α-chymotrypsin and active-site geometry, 261
Brown, G. S. (see also Shulman, R. G.), 305
Brown, R. S. (see also Hingerty, B.), 523
Brunori, M. (see also Wyman, J.), 161

Calcium in parvalbumin, replacement by terbium, 123
Calf thymus RNA polymerase II, localization of binding sites on polyoma DNA, 87
— — — — —, transcription of superhelical and linear polyoma DNA, 73
Carbon monoxide, reaction with Hb trout IV; thermodynamics of ligand binding and allosteric transition in hemoglobins, 161
Case, S. T. & Daneholt, B., The size of the transcription unit in Balbiani ring 2 of *Chironomus tentans* as derived from analysis of the primary transcript and 75 S RNA, 223
Catalytic activity and polymerization of beef liver glutamate dehydrogenase are uncoupled, 291
Cell surface proteins, isolation by hybridization, 689
Chauvin, C., Witz, J. & Jacrot, B., Structure of the tomato bushy stunt virus: a model for protein–RNA interaction, 641
Chestier, A. (see also Lescure, B.), 73
Chironomus tentans, size of the transcription unit in Balbiani ring 2 as derived from analysis of the primary transcript and 75 S RNA, 223
Chloramphenicol acetyltransferase from *Escherichia coli*, preliminary crystallographic data, 285
α-Chymotrypsin structure, comparison with structure of *Streptomyces griseus*, 261
Cloned β globin complementary DNA, generation of point mutations at the positions corresponding to amino acids 121 to 123; site-directed mutagenesis in DNA, 343
Cloning of replication and incompatibility regions from the R-plasmid R6K, 443
Coat protein polymerization of alfalfa mosaic virus strain VRU, 713
Cohen, C. (see also Wray, J.), 501
Coiled coil formation and sequence regularities in the helical regions of α-keratin, 297
ColE1 relaxation site and its surrounding nucleotide sequence, 601
Colicin E1 plasmid DNA, discontinuous replication in a cell extract containing thermolabile DNA ligase, 373
Coliphage λ*nut*L$^-$: a unique class of mutants defective in the site of gene *N* product utilization for antitermination of leftward transcription, 195
— T4 polymerase, theory of mechanisms; enzymatic determinants of DNA polymerase accuracy, 653
Colosimo, A. (see also Wyman, J.), 161
Computer analysis of protein–protein interaction, 323
COOH-terminal ends attach the amphiphilic membrane glycoproteins of Semliki Forest virus to the lipid bilayer, 535
Cornick, G. (see also Sowadski, J.), 123
C-protein of skeletal muscle, binding to F-actin, and its relation to the interaction of actin with myosin subfragment-1, 571
Crosa, J. H., Luttropp, L. K. & Falkow, S., Molecular cloning of replication and incompatibility regions from the R-plasmid R6K, 443
Crystalline *Streptomyces griseus* protease A, molecular structure at 2·8 Å resolution: crystallization, data collection and structural analysis, 243
— — — — —, — — — — — — —: molecular conformation, comparison with α-chymotrypsin and active-site geometry, 261
Crystallographic data on a complete κ-type human Bence–Jones protein, 287
— —, preliminary, for a chloramphenicol acetyltransferase from *Escherichia coli*, 285
— —, preliminary, for *Staphylococcus aureus* exfoliative toxin, 421

Daneholt, B. (see also Case, S. T.), 223
Darnell, J. E., Jr (see also Sommer, S.), 487
Dauguet, C. (see also Lescure, B.), 87
dCMP aminohydrolase, freezing in the activated conformation by glutaraldehyde, 133
Débarbouillé, M., Shuman, H. A., Silhavy, T. J. & Schwartz, M., Dominant constitutive mutations in *mal*T, the positive regulator gene of the maltose regulon in *Escherichia coli*, 359
Delbaere, L. T. J. (see also Brayer, G. D.), 243, 261
Deoxyribonuclease I cleavages in the nucleosome core, kinetic analysis; evidence for a DNA superhelix, 391
DNA, evidence for a superhelix; kinetic analysis of deoxyribonuclease I cleavages in the nucleosome core, 391
— ligase, thermolabile, and the discontinuous replication of colicin E1 plasmid DNA, 373
— methylases from *Bacillus amyloliquefaciens* and *Bacillus brevis*, sequence specificity, 701
— of polyoma virus, transcription *in vitro*: localization of calf thymus RNA polymerase II binding sites, 87
— — — —, — — —: transcription of superhelical and linear polyoma DNA by RNA polymerase II, 73

— polymerase, enzymatic determinants of accuracy; theory of coliphage T4 polymerase mechanisms, 653
— site-directed mutagenesis: generation of point mutations in cloned β globin complementary DNA at the positions corresponding to amino acids 121 to 123, 343
Dijkstra, B. W., Drenth, J., Kalk, K. H. & Vandermaelen, P. J., Three-dimensional structure and disulfide bond connections in bovine pancreatic phospholipase A_2, 53
Disulfide bond connections and three-dimensional structure in bovine pancreatic phospholipase A_2, 53
Dobberstein, B. (see also Garoff, H.), 587
Dominant constitutive mutations in *mal*T, the positive regulator gene of the maltose regulon in *Escherichia coli*, 359
Double-helical nucleic acid, two channels of hydrogen exchange, 61
Drenth, J. (see also Dijkstra, B. W.), 53
Driedonks, R. A., Krijgsman, P. C. J. & Mellema, J. E., Coat protein polymerization of alfalfa mosaic virus strain VRU, 713
Dubin, J. H. (see also Moos, C.), 571

Eisenberger, P. (see also Shulman, R. G.), 305
Elongation factor EF-Tu complexes, a new method of competitive labelling using reductive methylation, 551
Enzymatic determinants of DNA polymerase accuracy. Theory of coliphage T4 polymerase mechanisms, 653
Escherichia coli, activity of the replication terminus of plasmid R6K in hybrid replicons, 425
— — chloramphenicol acetyltransferase, preliminary crystallographic data, 285
— —, dominant constitutive mutations in *mal*T, the positive regulator gene of the maltose regulon, 359
— —, reactivity of amino groups in various complexes of the peptide chain elongation factor EF-Tu. A new method of competitive labelling using reductive methylation, 551
Exfoliative toxin from *Staphylococcus aureus*, preliminary crystallographic data, 421

F-actin binding of skeletal muscle C-protein, and its relation to the interaction of actin with myosin subfragment-1, 571
Falkow, S. (see also Crosa, J. H.), 443
Feng, I-N. M. (see also Moos, C.), 571
Filaments, actin, in muscle: pattern of myosin and tropomyosin/troponin attachments, 501
Fluorescence X-ray absorption studies of rubredoxin and its model compounds, 305
Folding and unfolding of globular proteins, mechanisms of the multiphasic kinetics, 177
Franklin, R. M. (see also Schneider, D.), 97

Pollock, T. J., Tessman, I. & Tessman, E. S., Radiological mapping of functional transcription units of bacteriophages ϕX174 and S13. The function of proximal and distal promoters, 147
Poly(A) of adenovirus-2 late messenger RNAs, nearby RNA structures, 27
Polymerase II for calf thymus RNA, localization of binding sites on polyoma DNA, 87
, transcription of superhelical and linear polyoma DNA, 73
— for DNA, enzymatic determinants of accuracy: theory of coliphage T4 polymerase mechanism, 653
Polymerization and catalytic activity of beef liver glutamate dehydrogenase are uncoupled, 291
Polyoma virus DNA transcription *in vitro*: localization of calf thymus RNA polymerase II binding sites, 87
: transcription of superhelical and linear polyoma DNA by RNA polymerase II, 73
Precursor isolation and characterization in T4 baseplate assembly. The complex of gene *10* and gene *11* products, 469
Promoter function, proximal and distal; radiological mapping of functional transcription units of bacteriophages ϕX174 and S13, 147
Protease A from *Streptomyces griseus*, molecular structure at 2·8 Å resolution: crystallization, data collection and structural analysis, 243
— — , — — — — — —: molecular conformation, comparison with α-chymotrypsin and active-site geometry, 261
Protein (see also C-protein), 571
—, Bence Jones, human, κ-type, complete, crystallographic data, 287
—, coat, polymerization of alfalfa mosaic virus strain VRU, 713
— –protein interaction, computer analysis, 323
— –RNA interaction; structure of the tomato bushy stunt virus, 641
Proteins, cell surface, isolation by hybridization, 689
—, globular, mechanisms of the multiphasic kinetics in the folding and unfolding, 177

Radiological mapping of functional transcription units of bacteriophages ϕX174 and S13. The function of proximal and distal promoters, 147
Raia, C. A. (see also Nucci, R.), 133
Reisler, E. (see also Zeiri, L.), 291
Relaxation site of ColE1 and its surrounding nucleotide sequence, 601
Replication and incompatibility regions from the R-plasmid R6K, molecular cloning, 443
—, discontinuous, of colicin E1 plasmid DNA in a cell extract containing thermolabile DNA ligase, 373
— terminus activity of plasmid R6K in hybrid replicons in *Escherichia coli*, 425
Restriction sites and the nucleotide sequence surrounding the relaxation site of ColE1, 601
RNA, messenger, HeLa cell, the absolute frequency of labeled *N*-6-methyladenosine decreases with label time, 487
— polymerase II binding site localization on polyoma DNA, 87
— — —, calf thymus, localization of binding sites on polyoma DNA, 87
— — —, calf thymus, transcription of superhelical and linear polyoma DNA, 73
— — — transcription of superhelical and linear polyoma DNA *in vitro*, 73
— 75 S and primary transcript sizes used in determination of the size of the transcription unit in Balbiani ring 2 of *Chironomus tentans*, 223
— structures near poly(A) of adenovirus-2 late messenger RNAs, 27
— –protein interaction; structure of the tomato bushy stunt virus, 641
R6K plasmid, molecular cloning of replication and incompatibility regions, 443
— —, activity of the replication terminus in hybrid replicons in *Escherichia coli*, 425
Rossi, M. (see also Nucci, R.), 133
Rubredoxin and its model compounds, fluorescence X-ray absorption studies, 305
